<b>Agenda item. – Protection of pigeons.</b>	Paul Gibb tabled the following recommendation As we are trying to have Pigeon Racing recognized as a sport with little success at the present time, I would like to recommend that a formal application be made to the Federal Government to have Racing Pigeons protected by a Federal Government Law as it was during the period up to the end of WW2. Such a law would offer fanciers protection from State and Local Government laws and regulations. For those that subscribe to the ARPJ magazine there is an interesting article in this month's issue that I wrote that I thought may be of use if we were to make an approach to the Federal Government, albeit that changes would have to be made.
